

A PROJECT REPORT ON

**AUTOMATIC TRAFFIC E-CHALLAN
GENERATION USING COMPUTER
VISION**

SUBMITTED TO THE SAVITRIBAI PHULE PUNE
UNIVERSITY IN THE PARTIAL FULFILLMENT OF THE
REQUIREMENTS FOR THE AWARD OF DEGREE

BACHELOR OF ENGINEERING

In

COMPUTER ENGINEERING

Of

SAVITRIBAI PHULE PUNE UNIVERSITY

By

SHRAYANK MISTRY	B150234309
PARAG NANKAR	B150234318
GAURAV PATIL	B150234334
PRATHAMESH TAMBE	B150234390

Under the guidance of
Prof. M. R. DHAGE

Sinhgad Institutes

**DEPARTMENT OF COMPUTER ENGINEERING
SINHGAD COLLEGE OF ENGINEERING, PUNE- 41**

Accredited by NAAC

2018-19

Date:

CERTIFICATE

This is to certify that the project report entitled
“Automatic Traffic E-challan Generation Using Computer Vision”

Submitted by

SHRAYANK MISTRY	B150234309
PARAG NANKAR	B150234318
GAURAV PATIL	B150234334
PRATHAMESH TAMBE	B150234390

is a bonafide work carried out by them under the supervision of Prof. M.R. Dhage and it is approved for the partial fulfillment of the requirements of Savitribai Phule Pune University, Pune for the award of the degree of Bachelor of Engineering (Computer Engineering) during the year 2018-19.

Prof. M.R. DHAGE

Prof. M.P. WANKHADE
Head
Department of Computer Engineering

Dr. S.D. LOKHANDE
Principal
Sinhgad College of Engineering

Acknowledgement

Working on this project is one of the wonderful and existing experiences in our lives. This report not only bears the testimony of existing efforts but also reflects the cooperation, help and guidance, which we received time to time. It is obvious but that we acknowledge them for their help without which the report would never have been completed.

We would like to express our deep gratitude to **Prof. M.R. DHAGE** for her profound guidance and support which helped us understanding the nuances of the project and make it work. We are thankful to her for her timely suggestions which helped us a lot in completion of this report.

Our heartfelt thankful for our Head of Department **Prof. M.P. WANKHADE** who has been a consistent motivator throughout the project.

We would also like to thank our review committee members - **Prof. Satpute, Prof. Shinde** and **Prof. Jayanti** who have helped us all time in one way or the other.

Lastly, and the most important, we extend our thanking to our parents and friends who have constantly guided and motivated us to accomplish the task successfully.

Abstract

Now-a-days the system that is being used to detect traffic violation at signals involves human intervention. Image for the camera at signals is given as information to the person checking for traffic violation in traffic control room and he/she manually checks the registration number from number plate and enters the registration number of the vehicle manually and the challan for that vehicle is generated. This system requires a lot of effort from two people so we have designed a system that is completely automated and fast as well as fast.

The Automatic recognition of license plate is the basis of effective management in traffic, in license plate recognition, the automatic detection and localization of license plate is an important part. License plate detection and localization contain how to extract or segment the license plate region from the license plate image.

The system proposed by us involves automatic detection of vehicles that break the traffic rules. The vehicle number detected is searched in the database for type of vehicle and owner's information. This information is used to generate challan in the name of the person who owes the vehicle directly and instantly and send appropriate fine message to the owner.

List of Figures

2.1	System Overview Diagram	4
2.2	Waterfall Diagram	9
2.3	Time Line chart	11
3.1	Use Case Diagram	15
3.2	Activity Diagram	16
3.3	Data Flow Diagram	17
3.4	Sequence Diagram	18
3.5	Deployment Diagram	19
3.6	Class Diagram	20
6.1	Initial Window	34
6.2	Output 1	35
6.3	Output 2	36

List of Tables

2.1	Software Interfaces	8
5.1	Unit Testing	31
5.2	Integration Testing	32
5.3	Acceptance Testing	33

Abbreviations

OCR	- Optical Character Recognition
E-Challan	- Electronic Challan
API	- Application Programming Interface
